DARSHAN JOGI

Darshansuniljogi@gmail.com | +91-9145480027 | [Portfolio](#) | [Linkedin](#) | [Github](#) | [Medium](#) | Hyderabad, IN

Education

National Forensics Science University, Gandhinagar (NFSU), India **2023 - 2025**
MSc Cyber Security | CGPA: **7.8**

Shri Shivaji Science College, Nagpur, India **2021 - 2023**
BCA | CGPA: 8.0

Skills

Web App Pentesting | Android Security | Burp Suite | Nmap | API Pentesting | Github |

Work Experience

Softcell Global | Security Analyst **July'25 - (Present)**
- Conducted **end-to-end security assessments** of the infrastructure network.

Carrier Global | Product Security Intern **Jan'25 - Jun'25**
- Conducted **end-to-end security assessments** of production-deployed Web and mobile applications.
- Executed over **15+** product pentests, from ticket creation through vulnerability reporting to final remediation verification.
- Created and maintained detailed penetration testing checklists, enhancing consistency and coverage of test cases.

Nethermind | Cyber Security Intern **Jan'25 - Jun'25**
- Tested Security for web3 applications.
- Web and Mobile Applications tested.

SecureMyOrg | Security Engineer Intern **Jan'24 - April'24**
- Performed comprehensive **Vulnerability Assessments and Penetration Testing (VAPT)** using SAST and DAST methodologies.
- Re-tested previously mitigated vulnerabilities and **discovered bypass techniques**, leading to improved patch strategies.
- Contributed to the internal knowledge base by documenting testing methodologies and findings.

Bug Bounty Hunting | Freelance **Mar'21 - Jan'25**
- Tested both **technical and business logic vulnerability** testing
- Reported **200+ valid vulnerabilities** across global platforms, spanning XSS, IDOR, SSRF, Broken Auth, and Business Logic flaws.
- Specializing in responsible disclosure programs and high-impact vulnerability reporting.

Projects

GhostPkg
- GhostPkg is a tool to detect potential Dependency Confusion vulnerabilities in public repositories GitHub organizations.
- scans for unreleased or missing package references in NPM, PyPI, and Go module ecosystems.

S3 Bucket Testing Automation **Feb'24**
- Built an automation framework to validate S3 configurations, data integrity, and access controls for enhanced cloud security

Subdomain Takeover Detection Automation **Nov'24**
- Created a Bash-based script that integrates with crt.sh to analyze domain certificates, identify CNAMEs, and detect takeover vulnerabilities

Certifications

- **Web Application Penetration Tester eXtreme ([eWPTX](#)), INE** Mar'24
- Certified Ethical Hacker (CEH v11 Practical), EC-Council May'22
- Offensive API Penetration Testing, HackerEra University Aug'21
- Smart Contract Security and Auditing, Cyfrin Jan'24
- Master Blockchain Technology, CodeEater.in Mar'23
